Architectural Profiles

For many years we have supplied our sinusoidal profiles and rainscreen products for Mercedes Benz dealerships throughout the UK. Indeed the same brand identity has been used on their HQ in Milton Keynes as well.

Jaguar Land Rover specify, as part of their Retail Corporate Identity, a mandatory rainscreen façade that APL supplies with our bespoke Alucobond panels and exclusive ‘cantilever’ support framework.

BMW has used various different materials, the most popular being our Louvre cladding and integrated Live Louvres. We have also supplied our StrongBak wall framing system that provides a very clean appearance and finish to workshop facilities.

Porsche have used our flat panel rainscreen systems and profiles for many years in their signature colours.

The list goes on

Ferrari

Maserati

McLaren

Audi

If you would like to know more about what we do, and how we do it, just get in touch.

Every project is different and we respect this.

Whether it is in

- material and system choice
 - help with detailing
 - developing specifications
 - comparing costs

APL can help with all aspects.

High quality materials and systems

Attentive service

Excellent value for money

There are good reasons that APL has been so heavily involved in Automotive for so long.

Who are Architectural Profiles?

APL is a specialist UK manufacturer and supplier of metal roofing and wall cladding systems.

Providing high quality, technically economic products and systems, APL has been established in the UK for well over 30 years.

Having worked with many of the country's leading Architects, Engineers and Contractors, APL has built a reputation for providing stylish, technically advanced, and extremely cost-effective building envelope solutions.

APL takes proven technology to provide a system that "exceeds the sum of the parts". All systems are available with with a minimum 25 year warranty for materials and structural design.
